

Uplands Lead Eco Code

Use the land to plant our future,

Put your heart and soul in it,

Love and respect all nature,

And keep our world brightly lit,

No action is too small,

Do your bit and you will see,

Saving our planet with all its glory.

Less electricity, lights out,

Eco Police are about!

Air conditioning, fans, heaters-do they really need to be on?

Do it right and in LEDs and energy saving we believe in and stand upon.

Just limit plastics and foil- it really isn't good for our soil,

Use all the resources, want not-waste not!

Not a one man job, we are invested

I pledge to save our planet,

OUR planet...our world...our lives...sooo,

Reduce, reuse and recycle is the way to go!
