The life and work of Sir David Attenborough

Introduction

David Attenborough is a famous natural historian and veteran broadcaster. He is famous on television for his amazing work as a conservationist looking after nature and animals. David Attenborough has a lot to ^{to make say} ~~save~~ ^{to save} our planet that ~~he~~ ^{he} ~~stopped~~ ^{stops} the animals going extinct from this world.

Early years

David Attenborough was born on 8th May 1926 in London, England. In his primary years, he moved to Leicester with his ^{father} ~~dad~~ because he had gotten a job there. By the age of seven, he had collected an impressive collection of bird eggs and fossils. After a while, he was awarded a scholarship to study natural science at the University of Cambridge. He even had two brothers and one of them was an actor named Richard Attenborough.

Broadcasting career

After many years, in 1954 he ~~launch~~ ^{launched} a television program titled Zoo Quest. Before the program Zoo Quest, David Attenborough worked for the BBC and had only seen one program but after a long time, he left the BBC to study social anthropology. David created another program Life on Earth and really this was his first program.
