

Back in February, the year 3 children had a fantastic opportunity to attend James Coles' Nursery in Leicestershire to enhance their knowledge of plants and how the workers there help them to germinate. During the visit, each child planted a seed. They have been germinating at the nursery to give them a great start.

On Friday, Mr Edwards visited the school with a special delivery - the plants! Mr Edwards presented each class with their tray and the children were able to take them home to plant in their own gardens. The plants were a mixture of sunflowers and sweet peas. The children thoroughly enjoyed their planting experience.
